

MRV SERIES

TMR Vertical Screw Mixer
stationary or mobile

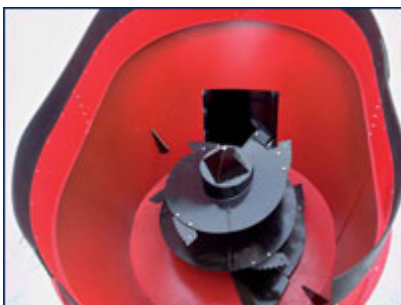

- This vertical mixer is a newcomer to the Rovibec family and is expected to have a long and fruitful career. It was, without question the uncontested star of the timed demonstrations at St-Liboire's (Expo Champs) exhibition last September where it demonstrated its full efficiency in terms of both the quality of the material produced and the speed at which it was prepared.

This vertical TMR mixer is built to order according to the needs of the individual dairy producer. Certain features are offered as options. Features, specifications and dimensions are subject to change without notice.

Available options

We offer you a different way for preparing your rations which now is proving more and more complete and which :

- Favors an increase in quantities ingested.
- Prepares daily balanced rations.
- Enhances value of the farm's produce.
- Reduces competition within the herd.
- Reduces work time.

This Rovibec Series MVR vertical mixer is a reliable piece of equipment that will give you many years of faithful service because, in addition to its simple mechanics, its construction is really robust.

This unit is available in stationary or mobile versions and, in addition, it is very versatile in that it is available in PTO operated or electrically driven formats. Furthermore, we offer a hybrid model which, depending on your requirements at the time, can be operated either by PTO or its electrical option.
